

Gain analytical insights and increase sales productivity with Geopointe for Salesforce

Geopointe for Salesforce provides location-enabled proximity searching, optimized routing, territory management, demographics and more so you can increase sales and make your sales team more productive. Current Geopointe features include:

- Maps of your data anywhere in the world
- Advanced routing, Optimization and Navigation
- Territory Management, Geo-Analytics & Advanced Visualization against Big Data

Geopointe is location intelligence. Using a map alongside your Salesforce data and other geo-data provides insights you cannot get anywhere else. Identify data trends, aggregate statistics by location, align your data with demographics and more.
