

Save time by bringing Gmail & Salesforce together!

Salesforce App exchange offers a wide range of solutions, for bringing your Gmail inbox right into your Salesforce instance. By evaluating your specific needs, we can help deliver the Gmail integration that best fits your business needs. Some of the features that can be included are tracking and logging your emails with Salesforce, syncing your Salesforce calendar with your Gmail (Google) calendar, while also setting meetings that are reflected in both systems. Along with tracking emails, there are opportunities to use Salesforce email templates in Gmail; edit records, manage tasks, record activities, create opportunities, save attachments to a contact or lead – that are recorded in Salesforce – without ever leaving your Gmail inbox. The possibilities are available to create seamless integration between both Salesforce & Gmail, and we can show you how.

For more information on this & other great ways to personalize your Salesforce, reach out to us at www.highfillservices.com/contact.html
